

Ceiling Selection Chart

Notes

1. Coffers - used in coffer (waffle) locations. Some size limitations. Need template to install mounting hardware
2. Span - single span panels (corridor). Depending on panel size, there may be limited access.
3. Modified system 'Suspended Accessible Reveal' - limited panel access (less than 50%).

- a.) Is the ceiling direct to substrate or suspended?
- b.) If suspended, is access required - and how much (50% - 100%)
- c.) If suspended, is upward or downward access required?
- d.) What panel size or module size is required?
- e.) If precurved, is it a simple (barrel vault), complex (cone) or curved (dome)?
