6. Ensure that a vapor barrier on Decoustics panels must be included for any single panel or group of panels installed below any opening or cutout. Also see vapor barrier locations on this drawing.
7. The finished cladding panel is supported in the ceiling grid. The thickness of each panel will be matched to ensure the proper grid support for installation.
8. Do not apply finishes to edges of panels or face of panels on site, refer to this drawing for cleaning and maintenance instructions for Claro finish.
