1. Please supply field dimensions to the nearest 2mm, Decoustics will calculate panel sizes.
2. Please verify and confirm all dimensions, mounting methods, and details.
3. All panel penetrations for light fixtures, electrical outlets, etc. to be field cut at owner's cost by Decoustics.
4. All panels, sprinklers, LED's etc. to be supported independently of acoustic panels.
5. Panels must be installed flat. If this cannot be done without doing damage to other facilities it may be necessary to shim hardware as required.
6. The finishes used on Decoustics panels are directionally sensitive. The back of each panel will be marked to show the correct orientation for installation.
7. Do not butt panels next to each other. Leave 2mm gaps between panels to allow for proper alignment.
8. For additional panel installation details, see data sheet.
