New Product Launch – Rondolo™

Decoustics® Redefines the Traditional Look of Wood in New High-Performance, Fire-Rated Wall & Ceiling Panel and Plank

(Toronto, On.) – The natural warmth, depth and richness of wood have long made it a favorite ceiling and wall panel material among architects and designers. However, there is an emphasis on products that blend the visual aesthetic of wood with the added features and benefits of acoustical performance and safety. Decoustics® is answering the call with the introduction of Rondolo™. New line of custom micro-perforated acoustical wood panels and planks merges the elegant look of wood with the lowest flame spread rating and superior sound absorption properties.

Decoustics Rondolo™ Panels Finished in Different Wood Veneers

The enhanced customization aspects of Decoustics Rondolo provides unmatched design flexibility for a seamless wood look in ceiling or wall panel applications. Featuring the look of a solid wood panel, micro perforations virtually disappear at a distance, giving the appearance of a monolithic wood panel. All Decoustics Rondolo panels can be custom-engineered in a wide range of unique shapes and sizes that can compliment any design.

Rondolo™ Plank Finished in Walnut Veneer

“We thrive on delivering products that create dramatic spaces to enrich the built environment,” says Simone Abele, Director, Sales & Marketing for Decoustics. “Ultimately, occupant safety is always of utmost importance and one of our top priorities. We not only obtained individual component certification, but also assembly approval for the fully finished product, making Rondolo unmatched in its category.”

Decoustics Rondolo is the only one in its class to achieve a Class A rating based on third party ASTM E84 testing on finished composite panels along with a Noise Reduction Coefficient (NRC) values of up to 0.95. The panels are manufactured from no-added urea formaldehyde (NAUF), releasing minimal volatile organic compounds (VOCs) that are found in many building materials.

Decoustics Rondolo is engineered for a precise fit and delivered on-site ready for installation. Panels can be integrated into Decoustics’ suspension and mounting systems, including Decoustics’ 100% downwardly accessible Ceilencio® system.

Rondolo™ Ceilencio® with a Built-up Design Return

About Decoustics

For over 40 years, Decoustics has served as a leader in interior architectural products through the design and manufacture of innovative acoustical ceiling panels, wall panels and systems. The custom division of CertainTeed Ceilings, Decoustics specializes in custom-engineered, high-precision solutions backed by world-class expertise and technical support. www.decoustics.com

About CertainTeed

Through the responsible development of innovative and sustainable building products, CertainTeed, headquartered in Malvern, Pennsylvania, has helped shape the building products industry for more than 110 years. Founded in 1904 as General Roofing Manufacturing Company, the firm's slogan "Quality Made *Certain*, Satisfaction *Guaranteed*," quickly inspired the name CertainTeed. Today, CertainTeed® is a leading brand of North American exterior and interior building products, including roofing, siding, fence, decking, railing, trim, insulation, gypsum and ceilings.

A subsidiary of Saint-Gobain, one of the world's largest and oldest building products companies, CertainTeed and its affiliates have more than 5,700 employees and more than 60 manufacturing facilities throughout the United States and Canada. The group had total sales of approximately \$3.3 billion in 2015. www.certainteed.com
