Ceiling Selection Chart

Notes
1. Coffer - used in coffer (waffle) locations. Some size limitations. Need template to install mounting hardware
2. Span - single span panels (corridor). Depending on panel size, there may be limited access.
3. Modified system 'Suspended Accessible Reveal' - limited panel access (less than 50%).

a.) Is the ceiling direct to substrate or suspended?
b.) If suspended, is access required - and how much (50% - 100%)
c.) If suspended, is upward or downward access required?
d.) What panel size or module size is required?
e.) If precurved, is it a simple (barrel vault), complex (cone) or curved (dome)?
